CHAIRMAN'S MESSAGE

This year we celebrate the 30th Anniversary of the National Registry of Radiation Protection Technologists (NRRPT). More importantly, we celebrate the success of nearly 4,900 individuals who pursued and accepted the challenge of Registration. I am honored to serve as chairman during 2006, which represents 30 years of dedication to the field of Radiation Protection Technology. Enclosed you will see significant milestones that have occurred over the 30 year history of the NRRPT.

In this handbook you will find a listing of registered practitioner, supporter and retired members. In addition, our corporate sponsors, award recipients, members of the NRRPT organization, and the bylaws are provided. For membership contact information and to view the

membership handbook on-line, please visit our website at www.NRRPT.org. The membership handbook is a communication tool that can be used to network; research products and services provided by our corporate sponsors or to just look up an old friend. I hope that you find this handbook useful and of good reference.

The objective of the NRRPT is encourage and promote the education and training of radiation protection technologists and, by so doing, promote and advance the science of health physics. There is no time more important than now to get involved with the community, a professional society, and/or special committees that are working toward the needs and demands of our future radiation protection professionals.

As we look back on the 30 years of significant accomplishments, look forward to the many challenges and opportunities that we as individuals and as a combined team will endeavor in the years to come.

Your continued support is sincerely appreciated.

Best Regards,

A handwritten signature in black ink that reads "Kelli A. Gallion".

MEETINGS

An annual meeting of the Board of Directors and Panel of Examiners is held each year in conjunction with the Health Physics Society Annual Meeting. A mid-year meeting may be held at a site determined by the Board of Directors.

June 24 – 28, 2006 (Annual) Providence, RI

PUBLICATIONS

Newsletter - An informational publication is available to practitioner and supporting members on a quarterly basis.

Membership Handbook - A publication of the Registry is available to practitioner and supporting members each year. Members are requested to keep the Executive Secretary informed regarding address changes.

REGISTRATION MAINTENANCE PROGRAM

The **NRRPT** Registration Maintenance Program is designed to help assure that Registered Radiation Protection Technologists (RRPTs) continue to maintain their professional qualification. The program requires RRPTs to participate in professional development activities after their initial registration, and it monitors those activities on a periodic basis. Meeting the requirements of the program is mandatory to maintain active registration. In addition, the RRPT must maintain membership in the Registry for the entire maintenance cycle.

The Registration Maintenance Program began January 1, 1999 and requires 20 points to be earned in each five-year cycle. The cycle begins and ends on a calendar year basis, i.e., begins January 1 of the first year of the cycle and ends December 31 of the last year of the cycle. All points must be earned within the cycle to which they apply.

For RRPTs registered on or before January 1, 1999, the first cycle will begin on that date. The first cycle for those registered after January 1, 1999, will begin on January 1 of the year following registration.

If you have comments or questions please contact Jim Martin, Continuing Education Committee Chairman at JMartin@cps.amergenenergy.com.

COLLEGE CREDITS

The **NRRPT**'s registration process has been evaluated under the American Council of Education's (ACE) Program on Noncollegiate Sponsored Instruction (PONSI). College-level credit has been recommended for NRRPT Registration as follows: In the lower division baccalaureate/associate degree category, 6 in Introduction to Radiological Science; in the upper division baccalaureate degree category, 8 SH in Radiation Detection and Measurement, 8 SH in Radiation Protection and Control, and 8 SH in Applied Health Physics Internship. For those students who already possess a baccalaureate degree, the upper division credit recommendations can be considered for graduate credit.

PONSI has an Advisory Service to assist with any problems that may be encountered when attempting to apply the recommendations to courses and programs of study at colleges and universities. The following information should be given when contacting the PONSI office about these problems: The name, address, and telephone number of the college or university official with whom you spoke; the name or your organization (**NRRPT**); and the name and address of the Registered Radiation Protection Technologist.
