CHAIRMAN'S MESSAGE

The Registry welcomes 2014 with excitement as we continue to seek opportunities to enhance and expand the Registry which now exceeds 5,000 members. This year marks my initial year as Chairman, a position I am truly honored to hold and with the assistance of the Board, I look forward to advancing the science of Health Physics through the Registry's actions. On the horizon are exciting opportunities to advance the Registry into the international sector. New construction, domestic and abroad, continues on new commercial power units and those new units will need experienced and knowledgeable staff to ensure success. Given that, the Registry is preparing to conduct the inaugural international exam in South Africa in 2015 which was developed using standard radiation protection principles and the International Atomic Energy Agency (IAEA) Safety Standards.

In this handbook you will find a listing of registered practitioners, supporters and retired members. In addition, our corporate sponsors, award recipients, members of the **NRPT** organization, and the bylaws are provided. The membership handbook is a communication tool that can be used to network; research products and services provided by our corporate sponsors or to just look up an old friend or co-worker. I hope that you find this handbook useful and a

good reference along with the information describing the organizational structure of the Registry.

The objective of the **NRPT** is to encourage and promote the education and training of Radiation Protection Technologists (RPTs) and, by so doing, promote and advance the science of Health Physics. One of the best ways to accomplish this objective is for our members to find opportunities to mentor less experienced RPTs to help them develop their skills and knowledge. As these RPTs gain experience, we need to encourage them to become Registered RPTs once they meet the examination requirements. Being an RRPT can provide many benefits as one continues their career by increasing their earning potential, providing college-level credits, or just by showing their employer that they are striving to improve themselves. Also, be a champion of the industry by encouraging students at the high school and college level to enter the field of radiation protection such as nuclear power, medical, etc.

The range of knowledge, experience and professionalism that you provide our industry is truly impressive. I look forward to the many challenges and opportunities that we as individuals and as an organization will endeavor in the years to come with the advancement of our profession. Again, I would like to say I am honored to be associated with the radiation protection professionals of this organization and am eager to advance the science of Health Physics.

Best Regards,

A handwritten signature in dark ink, appearing to read "E. M. Benfield". The signature is fluid and cursive.

PUBLICATIONS

Newsletter - An informational publication is available to practitioner and supporting members on a quarterly basis.

Membership Handbook - A publication of the Registry is available to practitioner and supporting members each year. Members are requested to keep the Executive Secretary informed regarding address changes.

REGISTRATION MAINTENANCE PROGRAM

The **NRRPT** Registration Maintenance Program is designed to help assure that Registered Radiation Protection Technologists (RRPTs) continue to maintain their professional qualification. The program requires RRPTs to participate in professional development activities after their initial registration, and it monitors those activities on a periodic basis. Meeting the requirements of the program is mandatory to maintain active registration. In addition, the RRPT must maintain membership in the Registry for the entire maintenance cycle.

The Registration Maintenance Program began January 1, 1999 and requires 20 points to be earned in each five-year cycle. The cycle begins and ends on a calendar year basis, i.e., begins January 1 of the first year of the cycle and ends December 31 of the last year of the cycle. All points must be earned within the cycle to which they apply.

For RRPTs registered on or before January 1, 1999, the first cycle will begin on that date. The first cycle for those registered after January 1, 1999, will begin on January 1 of the year following registration.

If you have comments or questions please contact Mark Bayless, Continuing Education Committee Chairman at mbayless@lanl.gov.

COLLEGE CREDITS

The American Council on Education's College Credit Recommendation Service (ACE CREDIT) has evaluated and recommended college credit for 1 of the **NRRPT** courses. The American Council on Education, the major coordinating body for all the nation's higher education institutions, seeks to provide leadership and a unifying voice on key higher education issues and to influence public policy through advocacy, research, and program initiatives.

ACE CREDIT connects workplace learning with colleges and universities by helping adults gain access to academic credit at colleges and universities for formal courses and examinations taken in the workplace or other settings outside traditional higher education.

For more than 30 years, colleges and universities have trusted ACE CREDIT to provide reliable course equivalency information to facilitate their decisions to award academic credit. For more information, visit the ACE CREDIT website <http://www.acenet.edu/acecredit>.
