CHAIRMAN'S MESSAGE

The Registry welcomes 2007 with excitement as we continue to seek opportunities to enhance and expand the Registry which currently stands at nearly 5,000 members. This year marks my final year as Chairman which I am honored to have had the opportunity to serve.

In this handbook you will find a listing of registered practitioner, supporter and retired members. In addition, our corporate sponsors, award recipients, members of the **NRRPT** organization, and the bylaws are provided. For membership contact information and to view the membership handbook on-line, please visit our website at www.NRRPT.org. The membership handbook is a communication tool that can be used to network; research products and services provided by our corporate sponsors or to just look up an old friend. I hope that you find this handbook useful and of good reference.

The objective of the **NRRPT** is to encourage and promote the education and training of radiation protection technologists and, by so doing, promote and advance the science of health physics. There is no time more important than now to get involved with your community, a professional society such as: the Health Physics Society (HPS), Canadian Nuclear Society (CNS), American Academy of Health Physics (AAHP), Canadian Radiation Protection Association (CRPA), National Council on Radiation Protection and Measurement (NCRP) and/or special committees that are working toward the needs and demands of our future radiation protection professionals.

As we look back on the 30+ years of significant accomplishments, I look forward to the many challenges and opportunities that we as individuals and as an organization will endeavor in the years to come.

Your continued support is sincerely appreciated.

Best Regards,

PUBLICATIONS

Newsletter - An informational publication is available to practitioner and supporting members on a quarterly basis.

Membership Handbook - A publication of the Registry is available to practitioner and supporting members each year. Members are requested to keep the Executive Secretary informed regarding address changes.

REGISTRATION MAINTENANCE PROGRAM

The **NRRT** Registration Maintenance Program is designed to help assure that Registered Radiation Protection Technologists (RRPTs) continue to maintain their professional qualification. The program requires RRPTs to participate in professional development activities after their initial registration, and it monitors those activities on a periodic basis. Meeting the requirements of the program is mandatory to maintain active registration. In addition, the RRPT must maintain membership in the Registry for the entire maintenance cycle.

The Registration Maintenance Program began January 1, 1999 and requires 20 points to be earned in each five-year cycle. The cycle begins and ends on a calendar year basis, i.e., begins January 1 of the first year of the cycle and ends December 31 of the last year of the cycle. All points must be earned within the cycle to which they apply.

For RRPTs registered on or before January 1, 1999, the first cycle will begin on that date. The first cycle for those registered after January 1, 1999, will begin on January 1 of the year following registration.

If you have comments or questions please contact Mark Bayless, Continuing Education Committee Chairman at mbayless@lanl.gov.

COLLEGE CREDITS

The **NRRT**'s registration process has been evaluated under the American Council of Education's (ACE) Program on Noncollegiate Sponsored Instruction (PONS). College-level credit has been recommended for NRRT Registration as follows: In the lower division baccalaureate/associate degree category, 6 in Introduction to Radiological Science; in the upper division baccalaureate degree category, 8 SH in Radiation Detection and Measurement, 8 SH in Radiation Protection and Control, and 8 SH in Applied Health Physics Internship. For those students who already possess a baccalaureate degree, the upper division credit recommendations can be considered for graduate credit.

PONS has an Advisory Service to assist with any problems that may be encountered when attempting to apply the recommendations to courses and programs of study at colleges and universities. The following information should be given when contacting the PONS office about these problems: The name, address, and telephone number of the college or university official with whom you spoke; the name or your organization (**NRRT**); and the name and address of the Registered Radiation Protection Technologist.

The PONS advisor for the **NRRT** is:
