NRRPT NEWS

OFFICIAL NEWSLETTER of the *National Registry of Radiation Protection Technologists*

September 2019

Incorporated April 12, 1976

Chairman's Message

Congratulations!

I want to welcome each and every one of the fifty four new RRPTs that studied for, took and passed the **NRRPT** Exam. There were thirty-two successful candidates from the February 2019 Exam and twenty-two successful candidates from the August 2019 exam bringing our Registry to an incredible 5658! All of you should be extremely proud of your accomplishment! In today's hectic life there are many distractions that attempt to keep us from reaching our goals but each of you managed to keep those distractions at bay and carve out the time to study and prepare for the exam – way to go!

For those that waited for your results to come back, it may have felt like an eternity before you got your results but I can assure you that the folks that take care of getting the results out are working almost non-stop to get the exams graded, quality checked and the results out. In fact, the Exam Panel has streamlined the process so well that the results are now out in a matter of a couple weeks instead of the month or two that it used to take. Everyone on the Exam Panel should be very proud of all the hard work that you do!

How Can You Help?

If it sounds like a lot of work is going on behind the scenes that is because there is! It takes a lot of effort to publish a newsletter, plus many people to put an exam together to make sure the questions are good to go, and hours of time to grade the exams and to quality control the results. We would love to have some of the Registry folks come share their experiences, join us on the Exam Panel or work with some of the committees that work diligently behind the scenes to

Greetings fellow RRPTs!

Welcome to Fall!

Welcome to the Fall 2019 **NRRPT** Newsletter. Thank you to the Newsletter Committee and all of the authors for putting in all the effort and long hours to turn out such a wonderful edition! This edition has a great technical article from Bob Wills about Carbon-14 in PWR/ PWR solid waste, an entertaining article from Pete Darnell on movie reviews and some educational articles about past accidents also from Pete Darnell. Hopefully, there is something in this issue that everyone will enjoy reading.

Inside This Issue

- Welcome New NRRPT Members
- Rad Movie Review—Deoxyribonucleic Acid
- 14C in PWR/BWR Solid Waste an Overview
- Panel Member Bio—Ryan Murdock
- NRRPT Blast from the Past
- Orlando NRRPT Night-Out
- Orlando NRRPT Board & Panel Annual Meeting
- NRRPT Sponsors

make the **NRRPT** awesome. Sending in an article for publication in the Newsletter would be fantastic. I am always interested in hearing how people successfully prepared themselves for the exam.

Our next **NRRPT** Board Meeting will be held January 24 – 27, 2020 in Key West Florida at the Marriott Beachside Hotel just prior to the RP-ALARA Association meeting. If any of you are attending the meeting, please stop by and say hello – I look forward to meeting all of you!

Respectfully,
Rick Rasmussen
NRRPT, Chairman of the Board

Welcome New NRRPT Members

Congratulations to the following individuals who successfully passed the
NRRPT Examination on August 3, 2019:

David B. Baker
Mario A. Bettolo
Bo Brickle
Scott A. Brookshier
Richard F. Charles
John M. Corbett
Timothy A. Crawford

Shasta L. Cross
John A. Cummings III
Jennifer M. England
Michael J. Ferrentino
Roger Gard
Justin P. Gillilan
Casey P. Hayes

Paul Kontz
Dylan Long
Jansen B. Lucas
Charles Mighells
Robert A. Nocco
Joshua D. Osteen
Alan Sedacki
Reginald R. Williams

Congratulations to the following individuals who successfully passed the
NRRPT Examination on February 22, 2019:

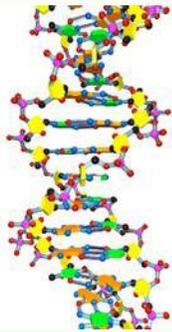

Ryan W. Bezzant
Kyle A. Blatter
Cal T. Brickle
Lucius G. Byrd
Matthew B. Cheatham
Rebecca B. Collins
Chad A. Dozier
Clay K. Elliott
Scott A. Engeman
Alan K. Franklin, II
Joshua M. Hayes

Gary T. Hinckley Jr.
David A. Hollaway
Kristina L. Holton
James J. Howell
Adam K. Howlett
Jerry D. Ingram
Emily Jackson
Anton P. Kodra
Ryan S. Larochelle
Heath M. Lucas
Brandon J. McKinlay

Kody B. Michel
Jonathan D. Nehl
Carol G. Rosaire
Charles A. Rose
Scott Shackelford
Richard J. Silcott
Ginger T. Sparks
Travis R. Stephens
Patrick J. Sullivan
Ryan E. Wilson

RAD MOVIE REVIEWS!

Deoxyribonucleic Acid

Struktura Z-DNA

Just try to picture this - it's June 1993. The science journal "Nature" publishes a story about the death of a weevil 130 million years ago. The poor thing died after feasting on wood pulp and becoming stuck in tree resin. As "Nature" tells the story, the weevil may have died where a brachiosaurus (vegetarian dinosaur) lived. Scientists were able to extract fragments of DNA (deoxyribonucleic acid - think building block of life) from the weevil.

So, the question begs - where did the scientists come up with the idea to try to find DNA in a resin-encased dead insect? Stan Lee (Spider Man)? Michael Crichton (Jurassic Park)?

Stargate SG-1 (an older TV show that uses made-up radioisotopes in some episodes)? Charles Pellegrino (author of "Dinosaur Capsule")? Well, in 1982, an entomologist named George Poinar, Jr. (and colleagues) were studying a fossilized fly found in amber. They figured it was around 40 million years old. Their research suggested that the amber was "an extreme form of mummification." What's so good about that? Mummification preserves cellular structures. Someone gets the bright idea that that it might be possible to extract DNA from the fly. Tada! The DNA of a dinosaur! Doesn't matter that DNA cross contamination makes this impossible. Doesn't matter that the half-life (yup! half-life just like Cobalt 60) of DNA is about 521 years.

You've probably been wondering how this is a movie review. It all has to do with the movies' basic plot. Mutation? Clones? Hybrid humans? Genetic engineering? All great plots for a good sci-fi flick. Here's a short list:

Spider Man (and all the remakes plus, the comic books) - the radioactive spider
Super Man - cosmic rays from our sun

X-men and sequels - genetic manipulation, some from radioactivity

Captain America - strange rays remake a 90-pound weakling to a super soldier

Jurassic Park (sequels abound!) - genetic engineering (they used a radioactive tracer to follow at least one dinosaur)

Godzilla (even more sequels) - genetic mutation from exposure to radioactive material

The Fifth Element - the aliens in this movie have super-evolved DNA

Teenage Mutant Ninja Turtles - The original characters were exposed to a glowing green goo - never said it was rad, but use your imagination!

Stargate SG-1 (a movie and three TV series) - naquida, the strange energy source, atomic bombs, space radiation and on, and on...

Star Wars - remember the clones?

Prometheus - who can resist a movie where aliens kill nearly everyone? The story is not about rad topics but there's an interesting DNA twist in the storyline

Frankenstein - okay, not radioactive but still cool

The Island of Dr. Moreau - not radioactive and a little less cool, but still a good story

There are lots more - I just can't list them all.

Pete Darnell, RRPT, CHP, amateur movie critic

^{14}C In PWR / BWR Solid Waste An Overview

Bob Wills

GEL Laboratories, LLC

Objectives

- Literature Review of ^{14}C Studies in Nuclear Reactors by: ORNL - 1977 and LUND University of Sweden 2007
- Review the transport models of ^{14}C in Light Water Reactors into solid waste
- Analysis of BWR and PWR ^{14}C data
- Analysis of ^{14}C to ^{60}Co ratios in solid waste
- Analytical methods utilized in ^{14}C analysis in solid waste

ORNL 1977 Paper on ^{14}C

- **CARBON-14 PRODUCTION In NUCLEAR Reactors : by Wallace Davis, Jr.**
- **Date Published: February 1, 1977**
- **Prepared for the U.S. Nuclear Regulatory Commission**
- **Office of Nuclear Material Safety & Safeguards**
- **Under Interagency Agreement E RDA 40-549-75**

Elsevier items and derived items © 2006, 2000, 1996 by Elsevier Inc.

Highlights of ORNL Paper - Mechanisms Of Carbon-14 Formation In Nuclear Reactors

- Focused on the Neutron activation of ^{14}C in Reactor Coolant, Reactor Internals, Fuel
- Carbon-14 is formed from five reactions of neutrons with **elements that are normal To The Primary Coolant**
- Complex chemical compounds that are formed then find their way to resin and filter media

Elsevier items and derived items © 2006, 2000, 1996 by Elsevier Inc.

Characterization: Hot Resin, Hot Filters and Constant Scaling Factors

- By Clint Miler : Pacific Gas and Electric
- ASME/EPRI Radwaste Workshop
- Colorado Springs, CO
- June 17-19, 2002

Elsevier items and derived items © 2006, 2000, 1996 by Elsevier Inc.

Lund University of Sweden C-14 Produced in PWR & BWR Reactors

- Doctoral Dissertation by Asa Magunsson
- August 15, 2007
- Looked at BWR , PWR waste in in Sweden
- ^{14}C in solid waste (Resin and Filters) 0.5% to 10% of total ^{14}C production production
- PWR's form mostly organic ^{14}C compounds and some carbonate compounds
- BWR 's form both organic and carbonate ^{14}C compounds
- Compounds Formed H^{14}CO_3 "Bicarbonate"

Elsevier items and derived items © 2006, 2000, 1996 by Elsevier Inc.

C-14 's Five Reactions That Are Most Likely To Take Place & Effect Rad Waste

- $^{13}\text{C} (n,\gamma) ^{14}\text{C}$
- $^{14}\text{N} (n,p) ^{14}\text{C} **$
- $^{15}\text{N} (n,d) ^{14}\text{C}$
- $^{16}\text{O} (n, ^3\text{He}) ^{14}\text{C}$
- $^{17}\text{O} (n,\alpha) ^{14}\text{C} **$

Note: ** Most Prominent Production in BWR, PWR Coolant

Transport models of ^{14}C in Light Water Reactors into solid waste

- As the ^{14}C compounds are formed in the primary coolant they form various chemical compounds
- BWR vent over 90% of the ^{14}C as $^{14}\text{CO}_2$ with the remainder being available to deposit on filters and resin
- PWR's vent 85% or more of the ^{14}C as organic gas compounds with the remainder being available to deposit on filters and resin (GEL testing shows 95% to 5% organic to CO_2 mix) ethane, methane, and propane

Compounds collected by resin and filters

- PWR's and BWR's form different ratios of both organic ^{14}C compounds and inorganic ^{14}C compounds
- Because of this GEL's chemistry must break down all organic compounds and the carbonate compounds mostly seen as H^{14}CO_3 - Bicarbonate
- Lets look at how ^{14}C values look through the waste media

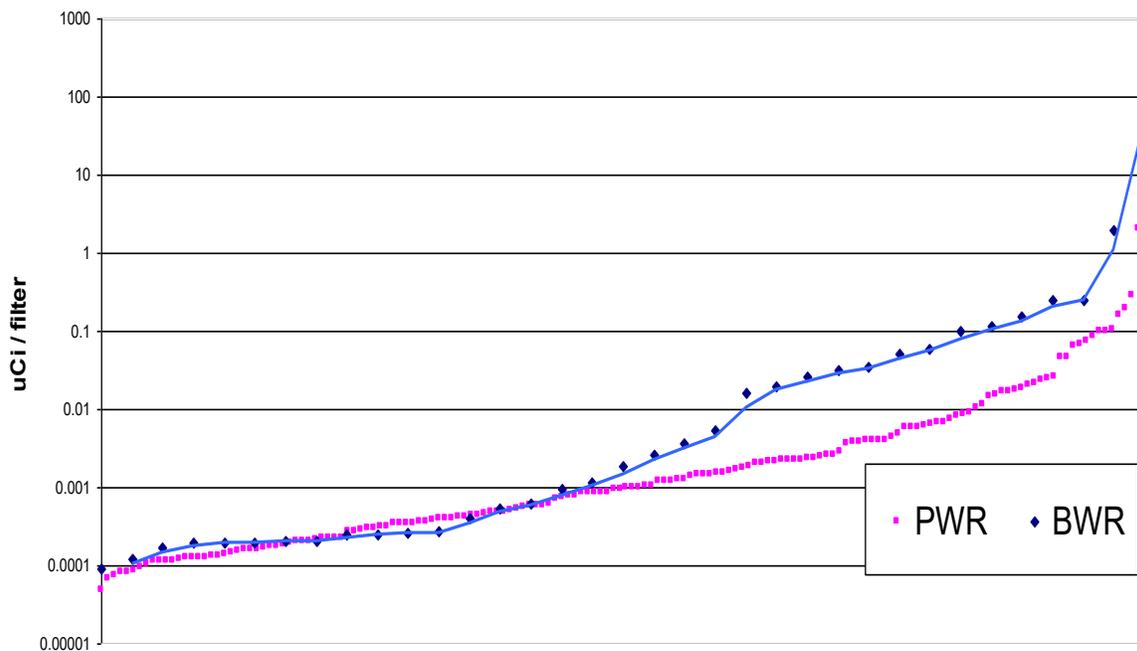

Elsevier items and derived items © 2006, 2000, 1996 by Elsevier Inc.

Let's Look at Plant Data

- PWR vs BWR Filter
- PWR vs BWR Resin
- PWR vs BWR Smears "DAW"

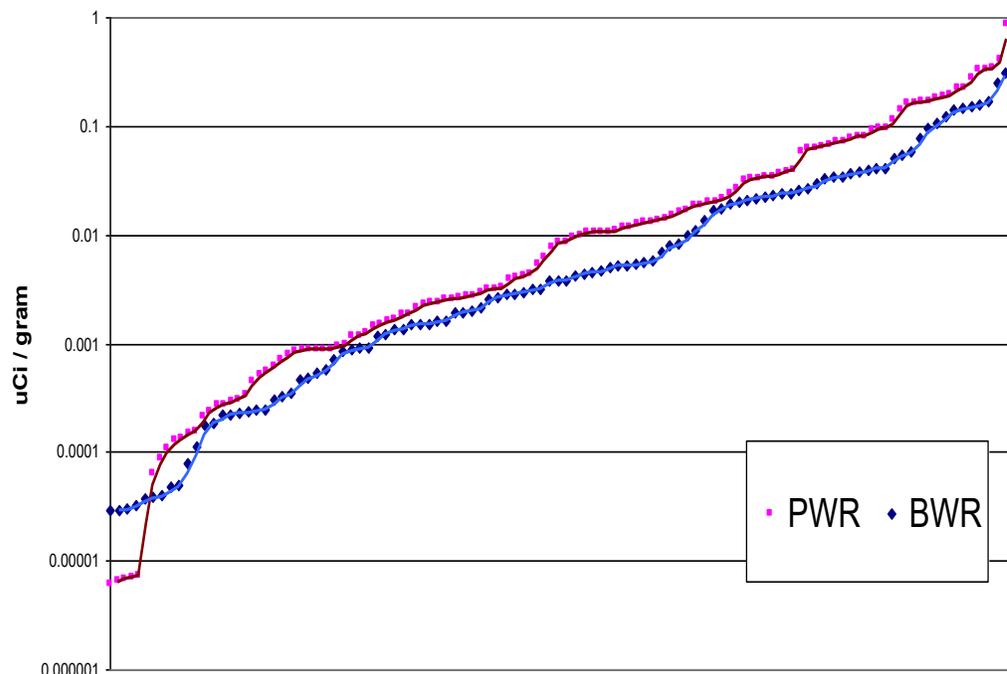

Elsevier items and derived items © 2006, 2000, 1996 by Elsevier Inc.

C14 Data in Filter Media

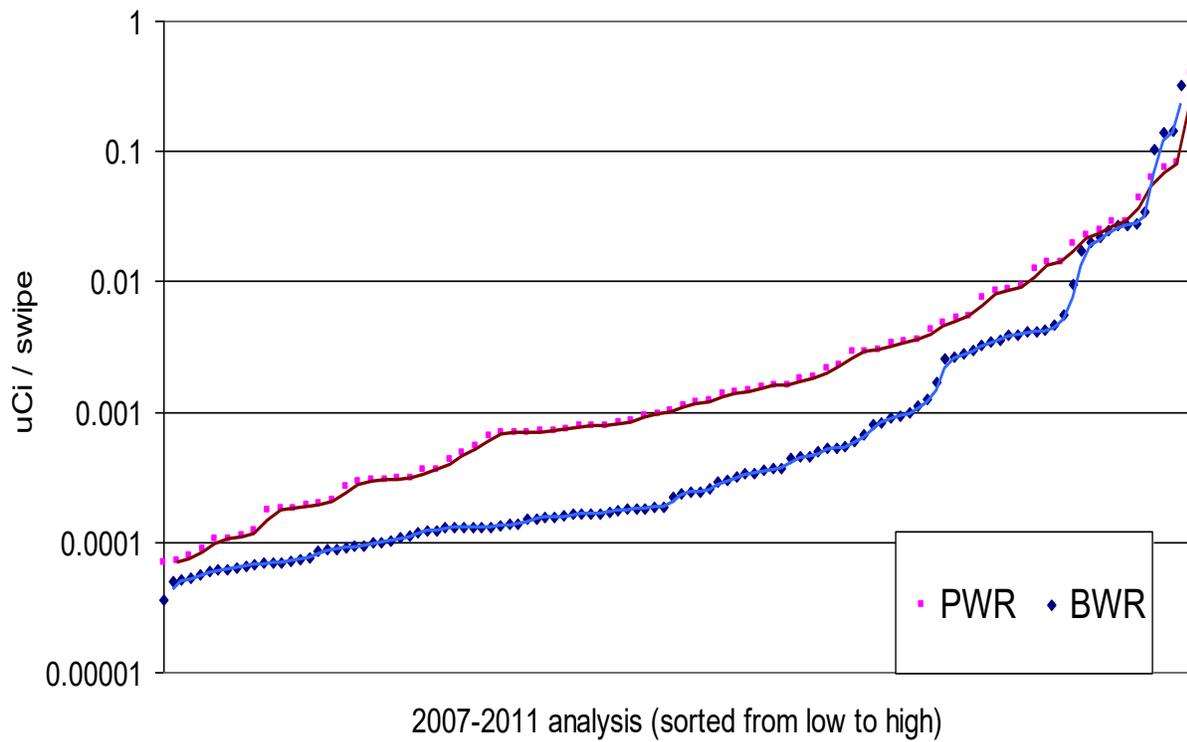

2007-2011 analysis (sorted from low to high)

C14 Data in Solid Media

2007-2011 analysis (sorted from low to high)

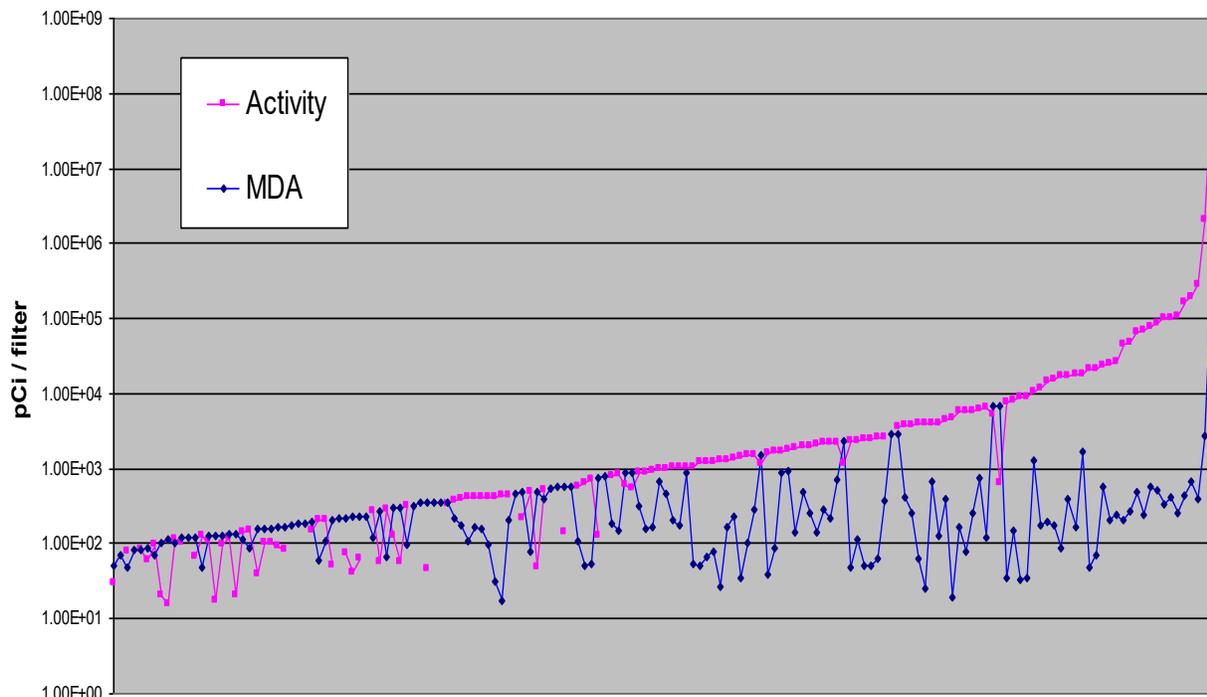

C14 Data in Swipe Media

¹⁴C Results for Filters vs LLD

Analytical Support for ¹⁴C in waste

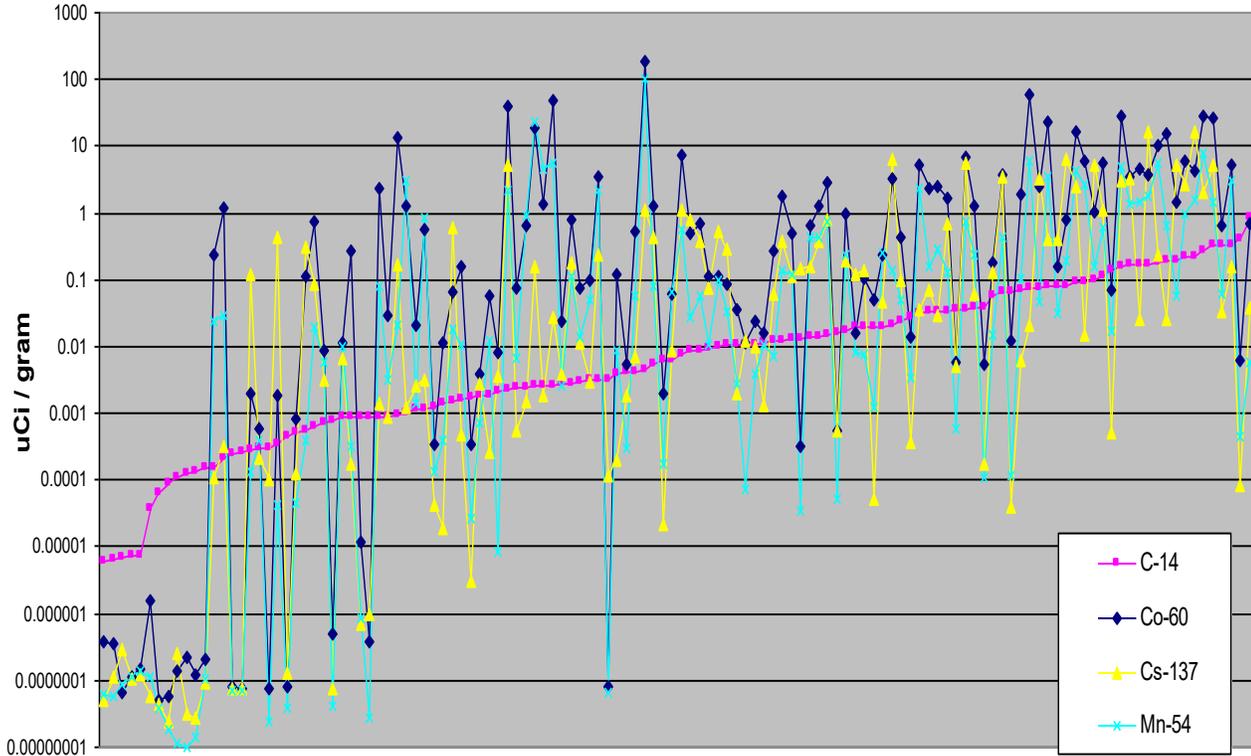

C-14 Results Compared to MDA for Filters

2007-2011 analysis (sorted low to high)

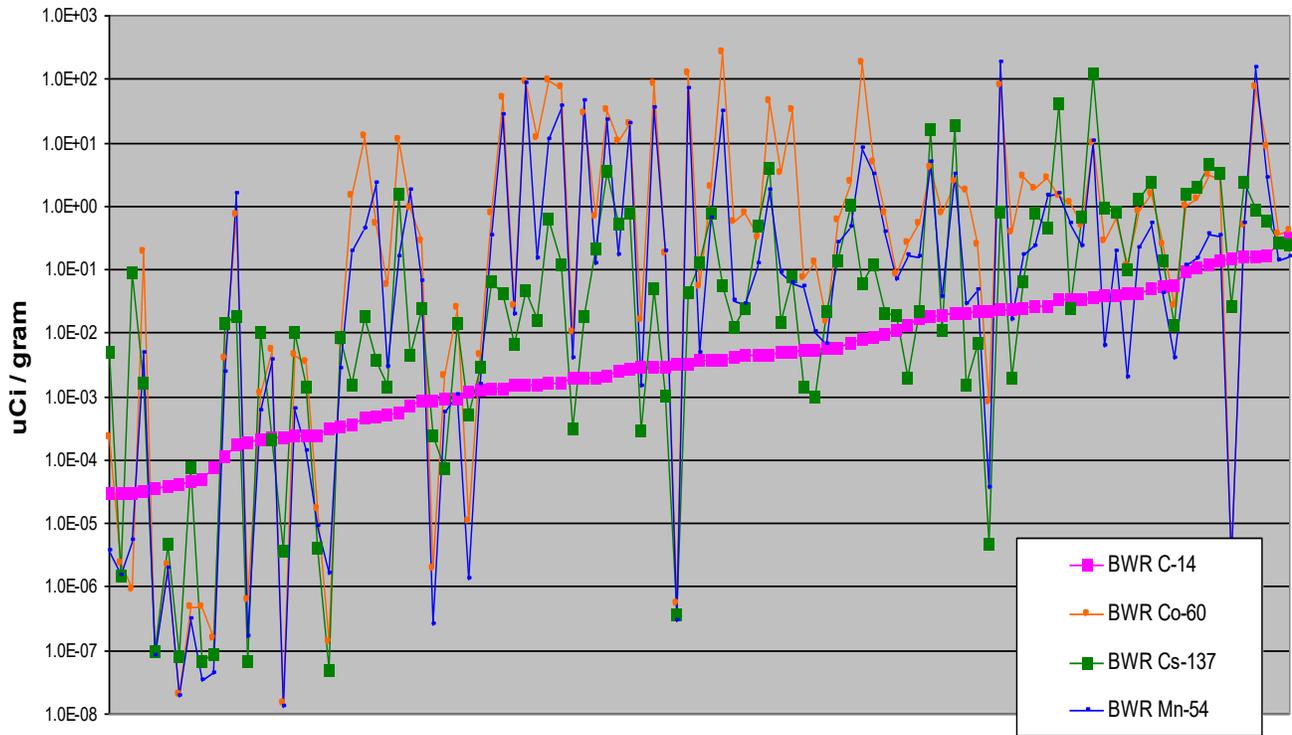

**^{14}C and Gamma Isotopes Any
Correlations ??
NO !!!!**

PWR Isotopic Comparison in Resins

2007-2011 Analysis (sorted by C14 from low to high)

BWR Isotopic Comparison in Resins

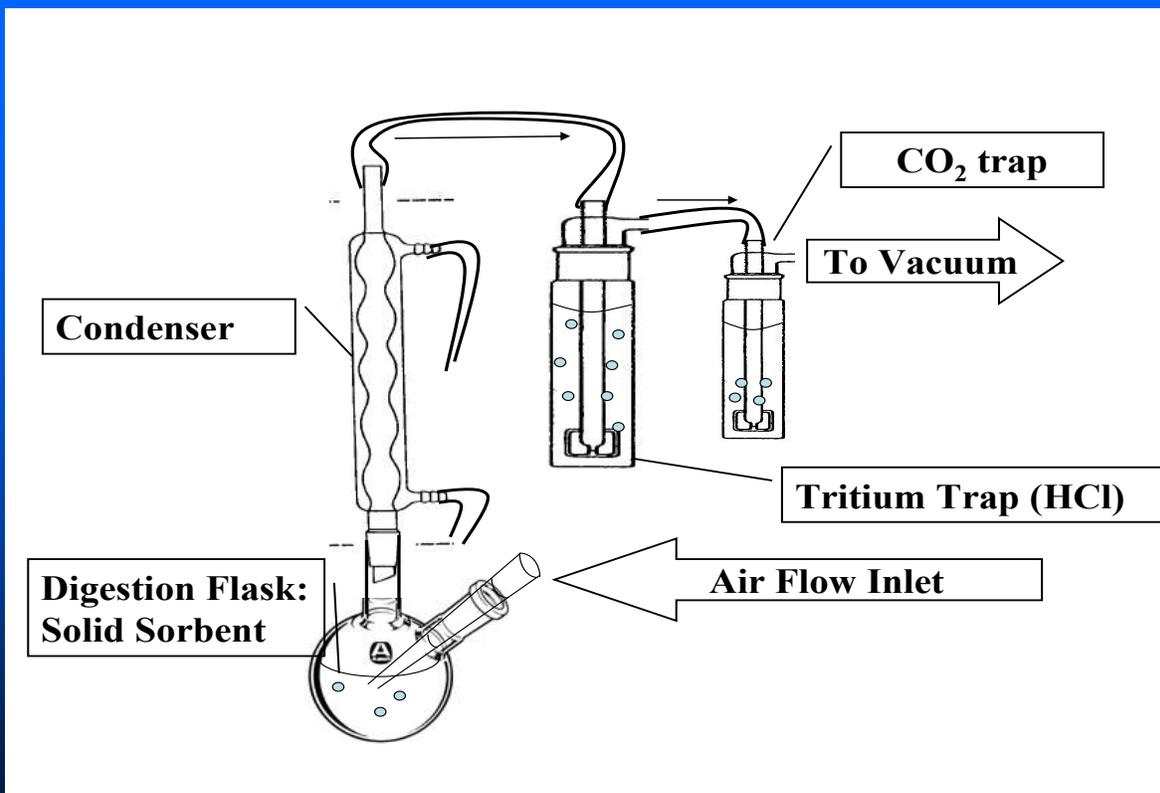

2007-2011 Analysis (Sorted by C14 low to high)

C-14 Analysis -Overview

- Sample is Digested in a Closed System
 - Acid converts inorganic carbon-14 to carbon dioxide
 - Potassium persulfate/ silver nitrate catalyst oxidizes any organic carbon to inorganic form

C-14 analysis in solid waste continued

- Carbon dioxide is distilled and trapped in an organic solvent
- The extracted carbon-14 is measured by liquid scintillation counting
- Interference Check
 - Any Positive Result is Confirmed by Gamma Spectrometry and/or Reanalysis

Elsevier items and derived items © 2006, 2000, 1996 by Elsevier Inc.

How Does GEL QA C-14

- LSC has a resolution of about 100keV
 - C-14 LSC vials are counted for any gamma isotopes that are distilled with carbon
 - No Detection so far in C-14 LSC vials
- Cs-137 Beta at 513 KeV
 - Confirmed too high to tail into the C-14 spectra

Conclusions

- Carbon is Often Present in Waste Streams
- Analysis is Capable of Handling Interferences
- BWR C14 trends HIGHER than PWR
 - Water Filtration Media
- BWR C14 trends LOWER than PWR
 - Solid (Resin) and Swipe Media

Panel Member Bio

Ryan Murdock

Ryan Murdock is a Technical Service Project Manager at Waste Control Specialists LLC (WCS). Ryan has been a member of the **NRRPT** for five years and is now serving on the **NRRPT** Exam Panel. As of February 2019, Ryan was nominated and voted to be on the **NRRPT** Board of Directors, he will begin serving on the NRRPT Board in February of 2020. Ryan has a Bachelor of Science degree in Radiation Protection. He has experience in Decontamination and Demolition, Department of Energy, the Commercial Nuclear Power industry as well as extensive experience in private industry Radioactive Material Handling and compliance. Ryan is currently pursuing his CHP. As a Technical Service Project Manager, Ryan manages all waste being shipped to the WCS site in Andrews, Texas. He is responsible for all waste to include RCRA, CERCLA, TSCA, low-level radioactive waste, and radioactive low-level mixed waste to meet WCS' Waste Acceptance Criteria for compliance. He works closely with DOE and TCEQ/NRC regulators to make sure all waste received or shipped from WCS is within local, state and federal regulations. Ryan was born and raised in Knoxville, Tennessee and currently lives in Trenton, Michigan. His career has taken him from Tennessee to New Jersey, then to Texas and finally to Michigan. He is a husband and a father of two. Ryan enjoys traveling with his family, golfing in his spare time and riding ATVs with friends.

NRRPT BLAST FROM THE PAST!

Good evening Mr. and Mrs. NRRPT, from border to border and coast to coast and all the ships at sea. Let's go back in time...

The Date: April 21, 1957

The Event: Criticality in a chamber for the purification of uranium solutions.

The Place: Mayak Enterprise, near Kasil and Tatysh, The Urals (think Russia)

The Cause: Deviation from regulations; lack of maintenance; and, personnel errors in accounting for process vessel temperature, total uranium, and other ingredients.

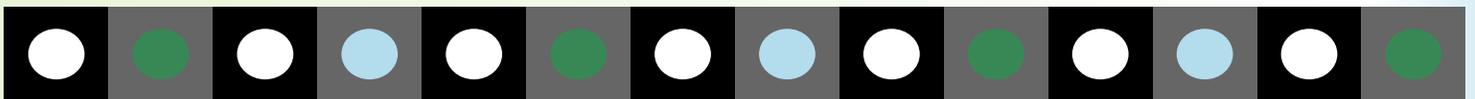

Satellite Image Mayak Facility

The Setup: The staff operated without following regulations. There was no regular cleanout of the equipment. They had no idea how much total uranium or other ingredients were in the system. Temperature of the process vessel was not monitored and the condition of the filter was not checked.

The Accident: Oxalate precipitate with a mass of 3.4 kilograms accumulated in the tank and a critical state was achieved for some time. An operator finally noticed that the filter was swelled and the precipitate was discharging gases. They stood by and watched for about 10 minutes. The reaction terminated when part of the solution was forced from the tank into the trap.

The Aftermath: Bad news – the criticality achieved about 2.7×10^{17} fissions. Worse news – 5 workers developed radiation sickness. Even worse news – the operator died 12 days after the accident.

Pete Darnell, RRPT, CHP, after-the-fact reporter

B & B Environmental Safety, Inc. (BBES) is a minority-owned, CVE-Certified Service-Disabled Veteran-Owned Small Business (SDVOSB) that provides a wide array of environmental services. BBES is headquartered in the Central Valley of Northern California. BBES was founded in 2005 as an environmental consulting company, specializing in radiological services. Since its inception, BBES became incorporated in 2007 and has expanded to have a regional office located in the Denver, Colorado Metro Area as well as numerous satellite offices. BBES offers its services throughout the entire United States and its territories. In addition to having an active California State Radioactive Materials License, BBES also maintains a Nuclear Regulatory Commission Broad-Scope Radioactive Materials License. When necessary and permissible, BBES will enact our NRC license to commence operations while any State-required RML issuance is pending.

More than just being a SDVOSB, BBES believes in the commitment to excellence demonstrated by those who currently or have previously served in the US Armed Forces. With most of BBES' employees being either Veterans or family members of Veterans, Trained First Responders, or other emergency service personnel, the corporate culture has evolved to that of a dedicated service organization that strives for excellence. BBES also continually looks for self-motivated, like-minded individuals who will commit to being an asset to the company.

Primary Services

- Radioactive, Mixed, Hazardous Waste Mitigation
- Site Surveys, Decontamination, and Remediation
- Environmental Consulting Services
- Radiological Services
- License & Regulatory Reviews/Audits
- Environmental Impact Studies
- Environmental Assessments (Phase I&II)
- Storm Water Pollution Prevention Program
- Training
- Program/Project Oversight & Management

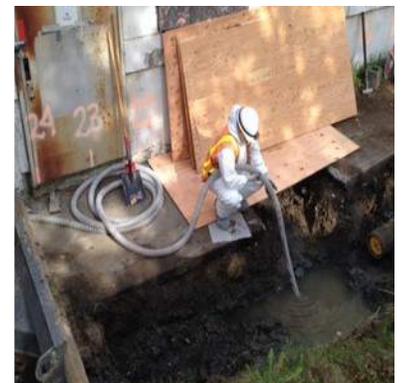

Key Benefits

- * 8(a) Graduate as of October 2015
- * Perfect Safety Record—No reportable lost time incidents
- * Very Good Regulatory Record—No major violations or lawsuits
- * A+ Rating with the Better Business Bureau of San Joaquin County California
- * Agreements in place with many companies: large, small, and with socioeconomic profiles
- * Great Teaming and Employment Opportunities

ENERGIZE YOUR CAREER AND JOIN THE BHI Energy TEAM!

As the largest provider of radiation safety technicians to the commercial nuclear power industry and Department of Energy facilities, BHI Energy offers over 4,000 Junior & Senior Radiation Safety opportunities annually.

- ⇒ Be a part of the “nuclear renaissance!” Now is the time to experience nuclear industry growth and exciting new opportunities with BHI Energy
- ⇒ Flexible assignments ideal for varied backgrounds – including industry retirees or those with Department of Energy experience
- ⇒ Competitive compensation & benefits, paid travel & living expenses
- ⇒ Training programs & career development for entry level positions
- ⇒ Flexible project locations in 35 states nationwide
- ⇒ Short term & temporary assignments available

To inquire about opportunities please contact:

Envirachem

Environmental Radiological and Chemical Services

Envirachem is a professional staffing and services company with wide-ranging experience providing both time proven and innovative solutions for a client’s environmental, radiological, and chemical needs. We support our clients in every phase of a project, from initial characterization, to project closure, and from initial license application, to license maintenance and corrective action.

At Envirachem we provide our clients with the best services available. Our philosophy is that if we can’t provide you with the best, then we’ll find someone who can. For that reason we provide comprehensive training and professional development programs to our employees. This allows Envirachem personnel to quickly respond to a variety of operational situations with informed and decisive action.

We provide a full complement of services but if you require a service not found on our site, or require additional information, please email us at sales@envirachem.com

GRIFFOLYN®: CONTAINMENT SYSTEMS FOR OUTAGE, MAINTENANCE & CONSTRUCTION PROTECTION

For more than four decades, Reef Industries has been providing a variety of specialty reinforced plastic laminates to the nuclear industry. These products are ideal for containment during outages, construction, maintenance and decommissioning projects. Strong, yet flexible, lightweight and easily handled, Griffolyn® products are highly resistant to tears and have an exceptional outdoor service life.

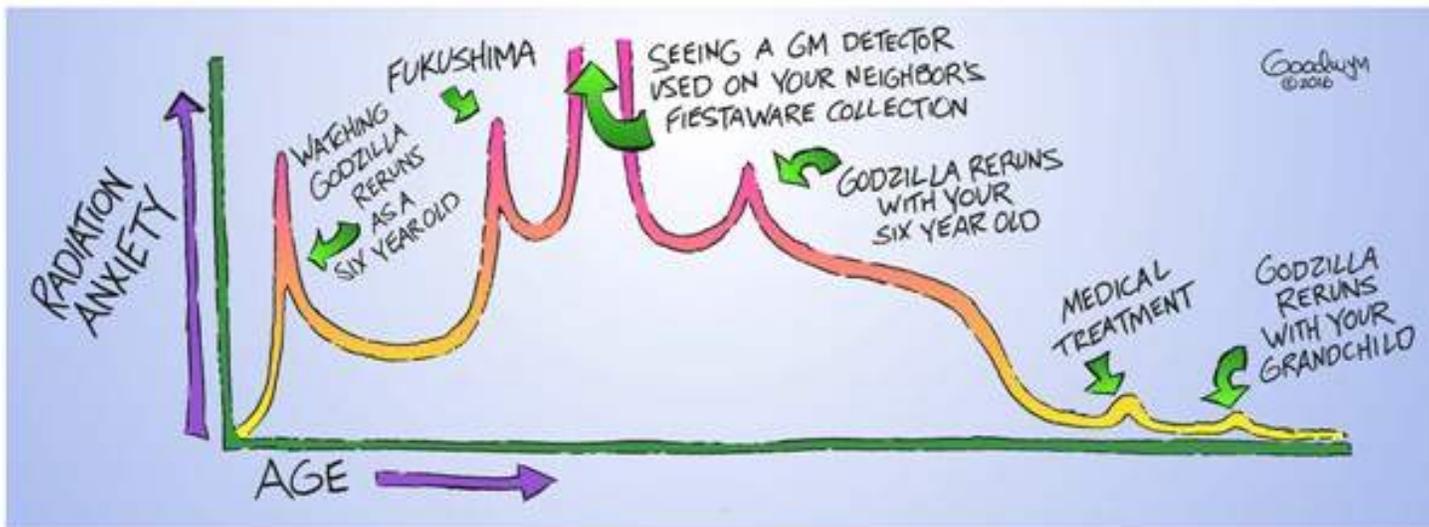

Griffolyn® can be produced with specialized properties including fire retardancy and low contamination for safety applications around critical materials or work areas. Performance features such as corrosion inhibition and anti-static properties are also available for sensitive equipment. Products range in weight, thickness and special composites, and are ideal for:

- Floor covers
- Custom box liners
- Containment enclosures
- Bags
- Tubing
- Outdoor/Indoor storage
- Shipping covers for contaminated equipment
- Secondary containment systems
- Decontamination pads
- Underslab vapor retarders for critical applications
- Feed water heaters/rotor covers
- Soft-sided packaging for surface contaminated objects
- FME barriers

The advantages of using Griffolyn® containment products for new plant construction and maintenance projects are vast but the immediate recognized benefit is the reduction in the costs associated with improving project schedules. Griffolyn® products reduce the volume of radwaste, which in turn lowers disposal costs.

From assisting in the design of uniquely configured and fabricated products to one of a kind materials custom built from scratch, Reef Industries' highly experienced staff can fabricate a product that meets your exact requirements. Custom printing capabilities are also available to meet any message requirements. We can custom configure a product with nylon zippers, hook and loop fasteners, grommets, D-rings, webbing, pipe loops or many other possibilities. Reef Industries can work with exact dimensions, sketches and/or ideas to custom design and build a product specifically suited for your needs.

Stock rolls and sizes are available for immediate shipment. If you require dependable, long-lasting, cost-effective on-site fabrication tape, Reef Industries can supply you with pressure sensitive and/or double-sided tape. Custom design and fabrication are available in 7-10 days.

Ameren Missouri-Callaway Energy Center

Cabrera is a trusted integrator for radiological remediation and munitions response solutions. We bring world class expertise in health physics and munitions response along with a broad base NRC radioactive materials license to solve our client's toughest challenges. As an integrator, we bring our

clients:

- Expertise in securing site closure/release;
- Smart design of characterization, sampling and FSS programs; and
- Innovative technologies that expedite closure, ensure compliant Material Control and Accountability, minimize remediation footprints and waste quantities for off-site transport and disposal, and achieve schedule and cost efficiencies.

Incorporated in 1983, Frham Safety Products, Inc. continues its sole purpose of manufacturing and distributing products to the Nuclear Power Utilities, DOE, DOD, Naval facilities as well as several industrial accounts and related users of safety supplies and equipment.

From the creators of proven products such as the Totes Overshoe and the Frham Tex II, Frham continues their objective to provide products and services which meet or exceed the specifications set forth by customers and the industries that it serves. These revolutionary new concepts include Life Cycle Cost Management (LCCM), Mobile Outage System Trailer (MOST) and Certified Disposable Products (CDP).

- LCCM offers products through a systematic approach of life cycle pricing to include disposal at the purchase point.
- MOST provides onsite product storage stocked systematically specified by the customer for easy access and stringent inventory control.
- CDP consists of proven disposables for every application which includes standard and custom specifications to meet your disposable needs.

Among these services and products, Frham also supplies chemical, biological and radiological equipment which will support applications for domestic, biological, nuclear, radiological or high explosive incident sites. This equipment is able to sample, detect and identify chemical warfare agents and radiological materials as well as provide safe-barrier, personal protection from chemical warfare, biological warfare, radiological and TIC/TIM environments.

F&J Specialty Products, Inc.

Frank M. Gavila
404 Cypress Road
Ocala, FL 34472
352.680.1177/352.680.1454 (fax)/fandjspecialty.com

ISO 9001:2008 certified manufacturer of traditional and advanced-technology air sampling instruments, airflow calibrators, filter holders, consumables and accessories.

Air Sampler product lines include; high and low volume, tritium, C-14 and battery-powered air sampling systems. Various models are available for both portable and environmental sampling systems. Consumable product line includes; filter paper, TEDA impregnated charcoal cartridges and silver zeolite cartridges. F&J provides comprehensive collection efficiency data for radioiodine collection cartridges.

F&J manufactures the premier line of small lightweight emergency response air samplers which can operate from line power, on-board batteries or an external DC power source. Battery powered units have on-board charging systems.

HI-Q ENVIRONMENTAL PRODUCTS COMPANY, INC.

Air Sampling & Radiation Monitoring Equipment, Systems & Accessories

HI-Q Environmental Products Company is an ISO 9001:2008 certified designer/manufacturer that has been providing air sampling equipment, systems and services to the nuclear and environmental monitoring industries since 1973. Our product line ranges from complete stack sampling systems to complex ambient air sampling stations. HI-Q's customers include the National Laboratories and numerous Federal and State Agencies in addition to our domestic and international commercial customer base. Our product catalog includes: Continuous duty high & low volume air samplers, radiation measurement instrumentation, radiation monitoring systems, air flow calibrators, radioiodine sampling cartridges, collection filter paper and both paper-only or combination style filter holders. Along with the ability to design complete, turn-key, stack and fume hood sampling systems, HI-Q has the capability to test ducts and vent stacks as required by ANSI N13.1-1999/2011.

Master-Lee Decon Services

Mirion Technologies is a leading provider of innovative products, systems and services related to the measurement, detection and monitoring of radiation. The company delivers high quality, state of the art solutions that constantly evolve to meet the changing needs of its customers. With the addition of the Canberra brand in 2016, Mirion expanded its portfolio and the breadth of its expertise to bring a new standard of solutions to the market. Every member of the Mirion team is focused on enhancing the customer experience by delivering superior products, exceptional service and unsurpassed support. Mirion Technologies: Radiation Safety. Amplified.

STP Nuclear Operating Company

Clayton Stone
P.O. Box 289
Wadsworth, TX 77843
www.stpegs.com

More than fifty registered Radiation Protection Technologists are proud to work at the South Texas Project's two nuclear power plants. These plants, some of the world's newest, produce more than 2500 megawatts of electricity. The plants, and the team that operates them, set industry standards in safety, reliability and efficiency.
